

How Long Will It Take?

The **average** runner has been known to complete a marathon anywhere between 3 and 6.5 hours; but the question is, how fast will Mr. Porco be able to finish the race?!

HOW IT WORKS

Purchase a square for \$10 that corresponds to the timeframe you think Mr. Porco will complete the race in

On October 20th timeframes will be placed in the squares and then reposted in your studio

- If the time Mr. Porco actually finishes the NYC Marathon in falls within timeframe we randomly put in your box, then you **WIN**

PRIZES
